TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React JS, Next JS, Vite, Zustand, Redux, Tailwind CSS, GSAP

Backend: Node.js, Express.js, Fastify, REST APIs, WebSockets, Socket.IO

Databases: PostgreSQL, MongoDB, Redis, TimescaleDB, Supabase

Developer Tools: Git, GitHub, Docker, Kafka, Prisma, Postman

Experience

[Modelence YC S25](#)

March 2026 - Present

Remote

Modelence Builder + Contributor

- Contributed to the open-source Modelence codebase by upgrading core authentication, testing edge cases, and adding missing authentication fields. [\(PR Merged\)](#)
- Built 3+ full-stack web applications using the Modelence framework, TypeScript, React.js, and MongoDB, with projects accepted for the Modelence Showcase. [Modelence Showcase](#)
- Collaborated with the Modelence team to test features, report issues, and debug complex workflows. Improved debugging and problem-solving skills by tracing complex application workflows and identifying edge cases.

Technologies Used: React Js, TypeScript, Node Js, MongoDB

Axes labs One (AL1)

March 2025 - September 2025

Remote - Dubai, UAE

Full Stack MERN Developer

- Built and deployed a full-stack Web3 real-time application featuring live multiplayer interactions and event-driven state synchronization using Socket.IO with basic anti-cheat validation.
- Web3 Dev: Developed and deployed **SUI Move smart contracts** to handle on-chain DApp purchase transactions
- Deployed and maintained a production MERN application on a cloud VPS while implementing CI/CD pipelines.

Technologies Used: React.Js, JavaScript, Node.Js, Express.Js, MongoDB, Redis, Socket.IO, Mysten DApp Kit, Phaser.Js

Projects

[Pie-Pack Exchange](#) | [A Full Stack Spot Trading Exchange](#) | [Github Link](#)

- Built a Real-time spot trading exchange with a custom price-time-priority matching engine (limit/market orders, OCO, stop-loss, and take-profit orders), Kafka-driven event log persisted to TimescaleDB, live order-book and trade feeds over WebSockets.
- Load-tested to 400 concurrent users placing orders (99.8% success) and 800 concurrent WebSocket clients (100% success), with the in-memory matching engine sustaining ~135 orders/sec.
- Technologies Used:** React Js, TypeScript, Node JS, Express, Kafka, TimescaleDB, WebSockets, PostgreSQL

[OpenBox](#) | [Modelence Hackathon Winning Project](#)

- Built an AI-powered platform that helps developers discover open-source repositories and beginner-friendly issues based on their programming languages and experience level.
- Used the [Modelence TypeScript framework](#) for authentication, AI modules, user management, and cloud infrastructure.
- Technologies Used:** React Js, TypeScript, Google Gemini AI, Modelence Backend, Tailwind CSS

[Fin-Tech Backend](#)

- A secure fintech backend with RBAC, JWT-based authentication, and full financial transaction management, including department-based access control.
- Backend has dashboard analytics with Redis caching and AI-powered chat assistant (Gemini) for personalized questions about financial data for better insights.
- Technologies Used:** Node.js, TypeScript, Fastify, MongoDB, Redis, JWT, Zod, Docker, Google Gemini AI

Education

Indira College of Commerce & Science, Pune

Bachelor of Science in Computer Science

June 2024 - June 2027

- Current CGPA: **8.7/10**
